EUROPEAN HEAD AND NECK COURSE

With the endorsement of

CME credits for Otolaryngologists,
Radiation Oncologists, Medical Oncologists
and Maxillo-Facial Surgeons

Presentation

- This 3-day course will cover several topics of Head and Neck cancer diagnosis, treatment and quality of clinical evaluation. The format will consist of lectures offering an update on the most relevant topics, panel debates and multidisciplinary approaches with discussions on clinical cases. Keynote addresses will focus on relevant and current topics. Audience interactive participation will be encouraged.
- The course is suitable for trainees, residents as well as practicing ENT and Maxillo-Facial Surgeons, Medical Oncologists and Radiation Oncologists.

Objectives

The Course will offer an update in the diagnosis, management and treatment of Head and Neck cancers, based on a multidisciplinary approach. Audience will be offered a working method to organize multidisciplinary decision-making processes, to audit clinical outcomes, and to evaluate the reliability of results published in scientific papers. Audience will be actively involved in these decision-making processes led by an outstanding international faculty. Registered participants will receive educational material and literature in order to support their interactive involvement and participation.
