

# Curriculum Vitae of Carmen Belli, MD, PhD

## **Current Position:**

Oncology Consultant at European Institute of Oncology, Milan, Italy

## **Business Address:**

Division of New Drug Development  
European Institute of Oncology  
Via Ripamonti 435  
20141 Milan  
Phone: +39 349 2820084  
Email: carmen.belli@ieo.it ; cbelli77@gmail.com

## **Education:**

2008: PhD in Medical and Surgical Oncology and Clinical Immunology, Seconda Università di Napoli, Naples, Italy  
2005: Board-Certified in Oncology with honours (50/50 cum laude), Seconda Università di Napoli, Naples, Italy  
2001: Medical Doctor with honours (110/110 cum laude), Seconda Università di Napoli, Naples, Italy

## **Brief Chronology of Activities:**

2015-to date: General Medical Council full registration as medical practitioner with specialist registration (GMC reference number 7464846)  
2013-to date: member of European Society of Medical Oncology (ESMO) and of Associazione Italiana Oncologia Medica (AIOM)  
2012-to date: member of Associazione Italiana Studio Pancreas (AISP)  
2009-2016: Oncology Consultant at San Raffaele Scientific Institute, Milan  
2008-2010: Collaboration with Italian Mesothelioma Group (Gi.Me) for developing new drugs for the treatment of malignant mesothelioma  
2008-2010: Advisor to Buzzi Foundation in drafting research projects and clinical trials on malignant mesothelioma  
2007-2008: Training in Biological Mass Spectrometry at San Raffaele Scientific Institute, Milan  
2005: Chairperson of the "Europa Donna Parlamento"  
2001-2005: Fellowship in Medical Oncology at Seconda Università di Napoli, Naples  
1998-2001: Training in Oncology at Oncology Department, Seconda Università di Napoli, Naples

## **Clinical Activity**

March 2017: Clinical and Research activity at European Institute of Oncology Milan  
2016-2017: Clinical activity at Oncology Department of Policlinico San Matteo - Pavia  
2008-2016: Clinical activity at Oncology Department of San Raffaele Hospital. Main areas covered: mesothelioma, lung cancer, upper gastrointestinal cancer, pancreatic and biliary cancer, head and neck cancer  
2001-2007: Clinical activity at Oncology Department of Seconda Università degli Studi di Napoli. Main areas covered: gastrointestinal and breast cancer  
2004 -2005: Urgent care activity at Clinica Santa Rita - Atripalda (Avellino)  
2004: Temporary replacement of general practitioner at ASL Napoli 1

## **Teaching**

April 2015: Teaching at San Raffaele University. Subject of the lesson: head and neck cancer  
May 2014: Teaching at San Raffaele University. Subject of the lesson: head and neck cancer  
Dec 2018: Lesson for Master in Biotechnology

## **Research Activity**

Dr. Belli has a wide range of clinical research experiences in mesothelioma, lung cancer, pancreatic cancer, upper gastrointestinal cancer, head and neck cancer, and breast cancer. She followed several clinical trials as co-investigator and wrote two clinical protocols and one biological research in pancreatic cancer.

She studied the role of diabetic condition and hyperinsulinism in the progression of pancreatic cancer and wrote a phase III clinical trial (PACT-17) evaluating the role of Metformin and polychemotherapy vs. polychemotherapy alone as first-line treatment of metastatic pancreatic cancer.

She also evaluated the role of Trabectedin as second-line therapy of metastatic pancreatic cancer in a phase II trial (PACT-18).

As for the biological research, she wrote a protocol aimed at evaluating the presence of cancer stem cell in patients affected by pancreatic cancer underwent to surgery or treated by neoadjuvant chemotherapy followed by surgery.

During her Ph.D., Dr. Belli analyzed serum proteomic profile of advanced lung cancer patients treated with EGFR Tyrosine Kinase Inhibitor (TKI). In a longitudinal study, she showed that serum proteomic profile can be used to classify likely responders to TKI therapy. This research laid the foundation of a randomized phase III trial (PROSE) assessing the predictive power of serum proteomic profile in non-small-cell lung cancer patients treated with erlotinib.

### **Clinical Trials “Co-Investigator”:**

- 1) GIM 1: “A phase III randomised study of sequential Etoposide plus Cyclophosphamide followed by Docetaxel (EC →D) versus the combination of 5-Fluorouracil, Etoposide plus Cyclophosphamide (FEC) as adjuvant treatment of node-negative early breast cancer”
- 2) GIM 2: “A phase III randomized study of EC followed by Paclitaxel versus FEC followed by Paclitaxel, all given either every 3 weeks or 2 weeks supported by Pegfilgrastim, for node positive breast cancer patients”
- 3) GIM 4: “Letrozole Adjuvant therapy Duration (LEAD) study: standard versus long treatment. A phase III trial in postmenopausal women with early breast cancer”
- 4) GIM 5: “Letrozole adjuvant therapy after Tamoxifen. Study of gene CYP19 correlation with letrozole efficacy in postmenopausal early breast cancer patients”
- 5) GIM 6 (Promise): “Prevention of chemotherapy-induced menopause by temporary ovarian suppression with Triptorelin versus control in young breast cancer patients. A randomized phase III multicenter study”
- 6) PROSE: “Randomized Proteomic Stratified Phase III Study of Second Line Erlotinib versus Chemotherapy in Patients with Inoperable Non Small Cell Lung Cancer”
- 7) PACT-12 “Phase II randomized trial of maintenance sunitinib or observation in metastatic pancreatic adenocarcinoma”.
- 8) PACT-15 “Studio randomizzato di fase II-III di chemioterapia peri- o post-operatoria nel carcinoma del pancreas resecabile”
- 9) PACT-17 “Studio randomizzato di fase II di chemioterapia ± metformina nel carcinoma del pancreas metastatico”
- 10) PACT-18 “Salvage therapy with trabectedin in metastatic pancreatic adenocarcinoma: A single-arm phase II trial
- 11) PACT-19 “Phase IB trial of nab-paclitaxel plus gemcitabine, capecitabine, and cisplatin in patients with stage III pancreatic adenocarcinoma”
- 12) MPACT “Phase III Study of ABI-007(Albumin-bound Paclitaxel) Plus Gemcitabine Versus Gemcitabine in Metastatic Adenocarcinoma of the Pancreas
- 13) APCAT: “A phase 3 randomized, open-label, multicenter trial evaluating the use of adjuvant nab-paclitaxel (nab-P) plus gemcitabine (G) versus G alone in patients (pts) with surgically resected ductal pancreatic adenocarcinoma (PDA)
- 14) MAESTRO “A Randomized, Double-Blind, Phase III Study of the Efficacy and Safety of Gemcitabine in Combination With TH-302 Compared With Gemcitabine in Combination With Placebo in Previously Untreated Subjects With Metastatic or Locally Advanced Unresectable Pancreatic Adenocarcinoma”
- 15) CBGJ398X2204 “A phase II multicenter, single arm study of oral BGJ398 in adult patients with advanced or metastatic cholangiocarcinoma with FGFR2 gene fusions or other FGFR genetic alterations who failed or are intolerant to platinum-based chemotherapy
- 16) JANUS “A Randomized, Double-Blind, Phase 3 Study of the JAK1/2 Inhibitor, Ruxolitinib or Placebo in Combination With Capecitabine in Subjects With Advanced or Metastatic Adenocarcinoma of the Pancreas who have Failed or Are Intolerant to First-Line Chemotherapy”
- 17) D081FC00001: “A Phase III, Randomised, Double Blind, Placebo Controlled, Multicentre Study of Maintenance Olaparib Monotherapy in Patients with gBRCA Mutated Metastatic Pancreatic Cancer whose Disease Has No Progressed on First Line Platinum Based Chemotherapy”

### **Publications:**

#### **Books**

##### **1) Book Author**

- Problemi psicologici in Oncologia. Studio nelle pazienti con carcinoma mammario. Lega Tumori Avellino, 1995
- Aspetti clinici e psicologici del paziente neoplastico terminale. Cappuccio Editore, Avellino, 1997

##### **2) Book Editor**

- Malignant mesothelioma. Intech, May 2012

### 3) Book Chapter Author

- Mesotelioma pleurico. Medicina Interna Sistemática. Claudio Rugarli Sesta Edizione
- Tumori del polmone. Medicina Interna Sistemática. Claudio Rugarli Sesta Edizione

- 3) Monochemioterapia con Gemcitabina nei pazienti "elderly" con NSCLC avanzato. Tumori in Età Geriatrica. II Congresso Nazionale - Roma, 7 Ottobre 1998
- 4) The use of transdermic fentanyl (TDF) in the treatment of chronic cancer pain. New Dimensions in Cancer Biology and Therapy - Naples, 24-25<sup>th</sup> September 1998
- 5) Stereotactic Needle Biopsy for Occult Breast Lesion: A Minimally Invasive Alternative. I Congresso Nazionale di Oncologia Medica - Roma, 24-28 Ottobre 1999
- 6) Paclitaxel (P) 3-Hours Infusion Plus Epirubicin (E) as First Line Therapy for Advanced Breast Cancer (ABC) Patients: A Preliminary analysis. I Congresso Nazionale di Oncologia Medica - Roma, 24-28 Ottobre 1999
- 7) Ruolo del Pamidronato disodico nel controllo del dolore da metastasi ossee e nel miglioramento della qualità di vita nelle neoplasie in fase avanzata. XXV Congresso Nazionale SIT. Società Italiana Tumori – Strategie Terapeutiche in Oncologia alle soglie del XXI Secolo - Sorrento 17-21 Novembre 1999
- 8) Vinorelbina + Gemcitabina nel trattamento del carcinoma polmonare non a piccole cellule (NSCLC) nei pazienti anziani. XXV Congresso Nazionale SIT. Società Italiana Tumori – Strategie Terapeutiche in Oncologia alle soglie del XXI Secolo - Sorrento 17-21 Novembre 1999
- 9) Subclinical lesion of the breast: our trial. 2<sup>nd</sup> Milan Breast Cancer Conference. Milan, June 14-16<sup>th</sup>, 2000
- 10) The role of core biopsy with 14 Gauge needles in the diagnosis of atypical ductal hyperplasia of the breast. 3<sup>rd</sup> Milan Breast Cancer Conference - Milan, 13-15<sup>th</sup> June 2001
- 11) The association chemo-radiotherapy in the treatment of locally advanced pancreatic cancer. Second International Cancer Congress - Rovigo, 5-7<sup>th</sup> December 2001
- 12) Trattamento integrato chemioradioterapico nei carcinomi avanzati del distretto cervico-cefalico. IV Congresso Interregionale AIOM - Firenze, 19-20 Aprile 2002
- 13) Treatment of multiple bone metastases with anastrozole plus radiotherapy in elderly patients with advanced breast cancer. 4<sup>th</sup> Milan Breast Cancer Conference - Milan, 5-7<sup>th</sup> June 2002
- 14) Associazione di Gemcitabina + Mitoxantrone nel trattamento del carcinoma mammario metastatico: nostra esperienza. Workshop: Marcatori Molecolari Emergenti in Oncologia: Terapia mirata, Indicatori di Risposta, Chemioprevenzione. International Cancer Center - Rovigo, 20 Settembre 2002
- 15) Hormonradiotherapy for metastatic breast cancer in patients with multiple bone metastases. XII Congresso Nazionale AIRO - Cagliari, 13-16 Ottobre 2002
- 16) Rituximab in the immunological treatment of severe post-fludarabine cytopenia: a case report. XXXIX Congress of the Italian Society of Hematology - Rome, 26-29<sup>th</sup> October 2003
- 17) Elevati livelli sierici perioperatori di VEGF in pazienti con carcinoma del colon. Giornate Scientifiche. Seconda Università degli Studi di Napoli - Napoli, 9-11 Giugno 2004
- 18) Studio di fase II di chemioterapia settimanale con Paclitaxel e Cisplatino associato alla radioterapia ed alla chirurgia come trattamento perioperatorio del cancro dell'esofago. Giornate Scientifiche. Seconda Università degli Studi di Napoli - Napoli, 9-11 Giugno 2004
- 19) Serum proteomic profile of non-small cell lung cancer (NSCLC) patients changes during therapy with epidermal growth factor receptor tyrosine kinase inhibitors (EGFR-TKIs)-preliminary report. hSR Scientific Retreat (SR)<sup>2</sup> - Stresa, 17-19<sup>th</sup> February 2008
- 20) Serum proteomic profile is specific for epidermal growth factor receptor tyrosine kinase inhibitors (EGFR-TKIs). hSR Scientific Retreat (SR)<sup>2</sup> - Stresa, 17-19<sup>th</sup> February 2008
- 21) Detection of serum proteomic profile predictive for epidermal growth factor receptor tyrosine kinase inhibitors (EGFR-TKIs) in 1st line chemotherapy. ASCO Annual Meeting - Chicago, 30<sup>th</sup> May-3<sup>rd</sup> June 2008
- 22) Changes in serum proteomic profile of non-small cell lung cancer (NSCLC) patients during therapy with epidermal growth factor receptor tyrosine kinase inhibitors (EGFR-TKIs): Preliminary study. ASCO Annual Meeting - Chicago, 30<sup>th</sup> May-3<sup>rd</sup> June 2008
- 23) The association between proteomic profile detected before 2<sup>nd</sup>/3<sup>rd</sup> line EGFR-TKIs and response to 1<sup>st</sup> line chemotherapy. ESMO Congress - Stockholm, 12-16<sup>th</sup> September 2008
- 24) Resistance to EGFR TKIs and serum proteomic profile in NSCLC patients. ESMO Congress - Stockholm, 12-16<sup>th</sup> September 2008
- 25) Impact of clinical parameters on outcome of patients treated with Gamma Knife Stereotactic radiosurgery for brain metastases from non small cell lung cancer. ESMO Congress - Stockholm, 12-16<sup>th</sup> September 2008
- 26) A randomized phase II trial of two different four-drug combinations in advanced pancreatic adenocarcinoma: cisplatin, capecitabine, gemcitabine plus either epirubicin or docetaxel. ESMO Congress - Berlin, 20-24<sup>th</sup> September 2009
- 27) Phase I study of the oral CDK-TRKA inhibitor PHA-848125 in combination with gemcitabine in advanced solid tumors ASCO Annual Meeting - Chicago, 4-8<sup>th</sup> June 2010

- 28) A 13-year single institution experience with 4-drug regimens in patients with advanced pancreatic adenocarcinoma (PA). 35<sup>th</sup> National Congress of the Italian Association for the Study of the Pancreas (AISP) - Peschiera del Garda, 13-15<sup>th</sup> October 2011
- 29) An Observational Study of a Four-drug Combination in Patients with Advanced Pancreatic Adenocarcinoma. XIII Congresso Nazionale AIOM - Bologna, 5-7<sup>th</sup> November 2011
- 30) Maintenance sunitinib (MS) or observation (O) in metastatic pancreatic adenocarcinoma (MPA): Clinical and translational results of a phase II randomized trial. ASCO Annual Meeting - Chicago, 1-5<sup>th</sup> June 2012
- 31) Maintenance therapy with alpha-interferon (IFN- $\alpha$ ) in locally advanced pancreatic cancer (LAPC): a pilot study. 44<sup>th</sup> European Pancreatic Club Meeting - Prague, 20-23<sup>rd</sup> June 2012
- 32) Metastatic site in pancreatic adenocarcinoma (PA) correlates with prognosis. 44<sup>th</sup> European Pancreatic Club Meeting - Prague, 20-23<sup>rd</sup> June 2012
- 33) Significant Association Between VEGF-A and ABCB1 Polymorphism and Survival in Metastatic Pancreatic Adenocarcinoma (MPA) Patients (PTS) Treated with Maintenance Sunitinib (MS). ESMO Congress - Vienna, 28<sup>th</sup> September-2<sup>nd</sup> October 2012
- 34) Clinical and Translational Results of a Phase II Randomized Trial of Maintenance Sunitinib or Observation in Metastatic Pancreatic Adenocarcinoma. 36<sup>th</sup> National Congress of the Italian Association for the Study of the Pancreas (AISP) - Bologna, 4-6<sup>th</sup> October 2012
- 35) Metastatic Site in Pancreatic Adenocarcinoma Correlates with Prognosis. 36<sup>th</sup> National Congress of the Italian Association for the Study of the Pancreas (AISP) - Bologna, 4-6<sup>th</sup> October 2012
- 36) Clinical and translational results of a phase II randomized trial of Maintenance sunitinib (MS) or observation (O) in metastatic pancreatic adenocarcinoma (MPA). XIV Congresso Nazionale AIOM - Bologna, 27-29<sup>th</sup> October 2012
- 37) A phase II trial of second line therapy with trabectedin in metastatic pancreatic adenocarcinoma (mPA). XIV Congresso Nazionale AIOM - Bologna, 27-29<sup>th</sup> October 2012
- 38) Metastatic site in pancreatic adenocarcinoma (PA) correlates with prognosis. XIV Congresso Nazionale AIOM -Bologna, 27-29<sup>th</sup> October 2012
- 39) Activity of *nab*-paclitaxel (*nab*-P) monotherapy in heavily pretreated pancreatic cancer (aPDAC) patients (pts): A multicenter retrospective analysis. C
- 40) K-ras status in biliary tract cancer (BTC): a single center experience. XV Congresso Nazionale AIOM – Milan, 11-13<sup>th</sup> October 2013
- 41) Phase Ib trial of *nab*-paclitaxel plus gemcitabine, capecitabine, and cisplatin in patients with stage III pancreatic adenocarcinoma. ESMO Congress - Madrid, 26-30<sup>th</sup> September 2014
- 42) Enhanced proteolytic processing of CgA predicts overall survival in patients with pancreatic adenocarcinoma. XVI Congresso Nazionale AIOM – Rome, 24-26<sup>th</sup> October 2014
- 43) Capecitabine (C) or capecitabine plus Mitomycin C (M): Results of a randomised phase II trial of second-line therapy in advanced biliary tract adenocarcinoma (BTA) XVI Congresso Nazionale AIOM – Rome, 24-26<sup>th</sup> October 2014
- 44) Phase Ib trial of *nab*-paclitaxel plus gemcitabine, capecitabine, and cisplatin in patients with stage III pancreatic adenocarcinoma. XVI Congresso Nazionale AIOM – Rome, 24-26<sup>th</sup> October 2014
- 45) Nab-Paclitaxel (Nab-P) is an active monotherapy in advanced pancreatic cancer (APDAC): Retrospective analysis of an Italian multiinstitutional experience in a heavily pretreated cohort of patients. XVI Congresso Nazionale AIOM – Rome, 24-26<sup>th</sup> October 2014
- 46) A Phase II, Open-label, Randomized Clinical Trial of Panitumumab plus Gemcitabine and Oxaliplatin (GEMOX) versus GEMOX alone as First Line Treatment in Advanced Biliary Tract Cancer. The Vecti-BIL Study. Gastrointestinal Cancers Symposium San Francisco 15-17<sup>th</sup> January 2015
- 47) Gemcitabine and Oxaliplatin (GEMOX) Chemotherapy with or without Panitumumab as First Line Treatment in Advanced Biliary Tract Cancer; updated survival results and subgroup analysis of the Vecti-BIL Study. 17<sup>th</sup> World Congress on Gastrointestinal Cancer. Barcelona, 1 – 4<sup>th</sup> July 2015
- 48) Multicenter randomized study of Gemcitabine and Oxaliplatin (GEMOX) +/-Panitumumab as First Line Treatment in K-Ras Wild type Advanced Biliary Tract Cancer; the VECTI-BIL study. XVII Congresso Nazionale AIOM – Rome, 23-25<sup>th</sup> October 2015
