EORTC MELANOMA GROUP MEETING
April 29th-30th, 2016
MILAN - ITALY
Istituto Europeo di Oncologia
via Ripamonti 435, Milan

Host
Alessandro Testori
Istituto Europeo di Oncologia, Milan, Italy

Group Chair
Caroline Robert
Institut Gustave Roussy, Paris, France

website: www.melanomagroup.eu
e-mail: alessandro.testori@ieo.it
April 28th

Steering Committee
Hotel NHOW Milano - Via Tortona, 35 - room Panama, 1st Floor

18:00 - 22:00 Steering Committee Members Only
Steering components:

Cook Martin,
The University of Manchester; The Christie NHS Foundation Trust – Manchester, United Kingdom
De Schaetzen Gaetan,
EORTC – Brussels, Belgium
Eggermont Alexander,
Gustave Roussy CCC – Villejuif, France
Ghanem Ghanem,
Institut J. Bordet – Brussels, Belgium
Leyvraz Serge,
University Hospital – Lausanne, Switzerland
Lorigan Paul,
The University of Manchester; The Christie NHS Foundation Trust – Manchester, United Kingdom
Marreaud Sandrine,
EORTC – Brussels, Belgium
Mihm Martin,
Brigham & Women’s Hospital – Boston, United States
Puig Susana,
Hospital Clinic, University of Barcelona – Barcelona, Spain
Robert Caroline,
Gustave Roussy- Villejuif, France
Schadendorf Dirk,
Universitätsklinikum Essen – Essen, Germany
Schilling Bastian,
University Hospital Essen – Essen, Germany
Suciu Stefan,
EORTC Headquarters – Brussels, Belgium
Testori Alessandro,
European Oncology Institute – Milan, Italy
Van Akkoi Alexander,
Netherlands Cancer Institute - Antoni van Leeuwenhoek (NCI-AVL) – Amsterdam, The Netherlands
Van Kempen Leon,
Jewish General Hospital / McGill University – Montreal, Canada

Invited to the steering: Francesca Martinelli - EORTC HQ Brussels
April 29th

Istituto Europeo di Oncologia (European Oncology Institute)
via Ripamonti 435 milano, room Leonardo La Pietra

10:00  Welcome message from Ing. Mauro Melis, CEO IEO, prof Roberto Orecchia scientific director IEO

Plenary session 1 (4 x 20’ presentation + 10’ discussion) open to non members and company employees

Chairs  
Alessandro Testori (Milano) & Caroline Robert (Paris)

10:10  Combination approach between locoregional treatment and immunotherapy
Paolo Ascierto (Napoli)

10:30  UK margins study report
Marc Moncrieff (Norwich)

10:50  Innovative study with combination of new drugs
Michele Maio (Siena)

11:10  Phase I Agenus studies report Dr. Robert Wesolowski, MD, Assistant Professor, Internal Medicine, College of Medicine and Director of Phase I Clinical Trials for the Division of Medical Oncology at the James Cancer Center at Ohio State University

11:30  Discussion

11:50  Plenary session 2
(3 x 12’ presentation + 3’ discussion) open to non members and company employees

Chairs  
Sara Gandini (Milano) & Susana Puig (Barcelona)

11:50  Molecular pathology topic TBD
Massimo Barberis (Milan)

12:10  Confocal microscopy in the intraoperative setting
Josef Malvehy (Barcelona)

12:25  Recent developments of the Melanoma Quality of Life questionnaire
Francesca Martinelli (Brussels)

12:40  Discussion

13:00 - 13:40  Lunch
**Afternoon sessions** (restricted to group members only; non members by invitation)

1. Neo-adjuvant versus adjuvant immunotherapy in melanoma: preliminary results of the OPACIN trial. Max Madu, Netherlands Cancer Institute, Amsterdam, The Netherlands
2. Indocyanin green and multispectral optoacoustic imaging can replace radioactive lymphoscintigraphy and histology in sentinel lymph node detection and determination. Joachim Klode, University Hospital, Essen, Germany
4. FDG-PET surveillance imaging in high-risk melanoma patients: time for change? Max Madu, Netherlands Cancer Institute, Amsterdam, The Netherlands
5. Mx1 incomplete loss in primary ulcerated melanoma: an observation that may help explain IFNy sensitivity of ulcerated melanoma? Camila Flores, Institut Gustave Roussy, Paris, France
6. PROPAANOLOL FOR OFF-LABEL TREATMENT OF MELANOMA PATIENTS:
A proof-of-concept prospective cohort study. Vincenzo de Giorgi, University of Florence, Italy

7. Cytoreductive treatment with BRAF + MEK inhibition of unresectable stage III melanoma is very promising: preliminary results of the REDUCTOR trial. Max Madu, Netherlands Cancer Institute, Amsterdam, The Netherlands

8. Intratumoural treatment with LTX-315, an oncolytic peptide immunotherapy, in patients with advanced metastatic disease induces infiltration of CD8 effector T-cells and regression in some injected tumours. Jean-Francois Baurain, Saint-Luc University Hospital Brussels, Belgium

16:30 - 17:10 Study Proposals (4 x 5’ presentation + 5’ discussion)

Plenary session

17:10 - 17:20 Coffee Break

17:20 - 18:20 HQ trial reports aula Leonardo la Pietra (restricted to group members)
Chair A. Van Akkooi (Amsterdam)

18:20 - 19:20 Sub-Committee Reports & Decision Making / Voting on New Proposals (restricted to group members)

19.20 Bus transfer to the Group Dinner (country house of Testori’s family)
April 30th

Parallel courses

Melanoma Pathology Working Group Meeting for European Dermatopathologists and Pathologists

Milan, Italy - April 30, 2016

Local Host

Giovanni Mazzarol and Alessandro Testori, Istituto Europeo di Oncologia, Milan

Course Moderators

Daniela Massi, M.D.  Associate Professor of Pathology  Division of Pathological Anatomy University of Florence. Florence, Italy

Martin Cook, M.D.  Chairman, EORTC Melanoma Pathology Group Royal County Surrey Hospital Guildford, UK

Course Location

Istituto Europeo di Oncologia, aula “B” ground floor, Via Ripamonti 435, Milano.

No Fee to Attend. European CME credits by the EACCME (European Accreditation Council for Continuing Medical Education) will be requested.

If you wish to attend, please register (before February 28th 2016) through our website:

www.melanomagroup.eu

In case of questions, please e-mail to: eortc.deaeventi@gmail.com

Scientific Programme - 08.00 - 11:00 aula “B” ground floor

Teaching Course Faculty

Willeke Blokx, Radboud umc - Nijmegen, The Netherlands

Martin Cook, Royal Surrey County Hospital – Guildford, United Kingdom

Senada Koljenovic, Erasmus University Medical Centre - Rotterdam, The Netherlands

Daniela Massi, University of Florence - Florence, Italy

Giovanni Mazzarol, European Oncology Institute - Milan, Italy

Martin C. Mihm, Brigham & Women’s Hospital – Boston, United States

Joost van der Oord, University Hospitals Leuven- Leuven, Belgium

Pathological Staging in Cutaneous Melanoma: Problematic Areas

This course is designed to bring to light problematic areas related to pathological staging of cutaneous melanoma using a case-based approach. Topics include the recognition of regression, the estimation of tumor infiltrating lymphocytes (TILs) and ulceration, proper handling and interpretation of sentinel lymph nodes in melanoma patients. Incorrect interpretation and poor standardization of these parameters have strong implications on
patients’ clinical management and can dramatically impact on the recruitment of melanoma patients in EORTC clinical trials.
The course will be presented in a case-based format. Pre-registrants will be able to view virtual slides prior to the meeting, the participants will be encouraged to submit their most appropriate answers in advance to facilitate a more lively discussion during the course with active participation from the audience.

**Message from the Chairman of the EORTC Melanoma Pathology Group**

The Teaching Courses of the EORTC Melanoma Pathology now represent a regular component of the EORTC Melanoma Group meetings. The main educational aim is to enhance the participants’ professional competence in the diagnosis of melanocytic lesions providing information on current standardized protocols, criteria, classifications and share, in a friendly and enthusiastic atmosphere, basic science information and novel experimental data.

Virtual slides allow the participants to review the cases and express their opinions prior to the meeting, in order to enhance discussion and active participation. In Milan, emphasis will be placed to the complex assessment of sentinel lymph nodes, a topic that will be discussed in presence of an internationally-recognized faculty.

Looking forward to seeing you in Milan,

Prof. Martin Cook  
Chairman, EORTC Melanoma Pathology Group
Melanoma Confocal Working Group Meeting
for European Dermatopathologists and Dermatologists

Teaching Course

Reflectance Confocal Microscopy in Melanoma: From basic criteria to clinical application in daily practice

Scientific Programme (aula Leonardo La Pietra) 8.00-11.00
This course is designed to bring to light reflectance confocal microscopy criteria for the
diagnosis in cutaneous melanoma using a case-based approach. Topics include the recognition of suspicion criteria and pitfalls, both for beginners and more advanced users. The course will be presented in a case-based format. Pre-registrants will be able to view virtual cases prior to the meeting. The participants will be encouraged to submit their most appropriate answers in advance to facilitate a more lively discussion during the course with active participation from the audience.

Message from the Chairman of the EORTC Melanoma Pathology Group

The Teaching Courses of the EORTC Melanoma group now represent a regular component of the EORTC Melanoma Group meetings. The main educational aim is to enhance the participants’ professional competence in the diagnosis and management of melanocytic lesions. In this sense, the Reflectance Confocal Microscopy course is incorporated in the present meeting as complement of the case based discussion cases performed in the previous edition of the dermatopathology course.

Virtual cases will allow the participants to review the cases and express their opinions prior to the meeting, in order to enhance discussion and active participation. In Milan, cases will be discussed together with expert pathologist in the field.

Looking forward to seeing you in Milan,

Prof. Susana Puig
Chairman, EORTC Melanoma Early Stage Group

Melanoma Pathology & Dermatology Working Group Meeting for European Dermatologists and Pathologists

Local Host
Giovanni Mazzarol and Giuseppe Spadola

Martin Cook, M.D. Chairman, EORTC Melanoma Pathology Group Royal County Surrey Hospital Guildford, UK
Reflectance Confocal Microscopy in Melanoma: From basic criteria to clinical application in daily practice

This course is designed to bring to light reflectance confocal microscopy criteria for the diagnosis in cutaneous melanoma using a case-based approach. Topics include the recognition of suspicion criteria and pitfalls, both for beginners and more advanced users. The course will be presented in a case-based format and will give insights into confocal/dermoscopy-pathology correlations. Pre-registrants will be able to view virtual cases, including digital histopathological slides, prior to the meeting. The participants will be encouraged to submit their most appropriate answers in advance to facilitate a more lively discussion during the course with active participation from the audience. Participants will learn to recognize confocal and dermoscopic structures, their histologic correlates, focusing on criteria that are essential in helping clinicians classify skin lesions as benign or malignant.
